random
nearly reducible
two weakly coupled blocks
30/30 below 10^{-6}
Wilkinson W_n^+
$< 10^{-6}$
tridiagonal Toeplitz
diagonal, repeated eigenvalues
30/30 below 10^{-6}
$D = 0$
ramp $D = (\delta/n)X$
random $t \in [0, \delta/n]$, $D = tX$
random diagonal $|D_{ii}| \le \delta$
Algorithm 1, $D = t_* X$
best t on a grid (oracle)
10^{-6} 10^{-5} 10^{-4} 10^{-3} 10^{-2} 10^{-1}
gap$(T + D)$, $n = 100$, $\|D\|_2 \le \delta = 0.48$
