n
gap($T + t_* X$), fp-certified early stop
certificate $h_*^2/(2^{20}n^4)$, fp-certified early stop
last fp-decidable iterate (not certified in double precision)
gap($T + tX$), rigorous, all K refinements
certificate $h^2/(2^{20}n^4)$, rigorous, all K
gap(T) (unperturbed)
worst-case bound $2^{-36}\delta^2 n^{-12}$
